

REPORT OF CHIEF ENGINEER
HUDSON RIVER - BLACK RIVER REGULATING DISTRICT
BOARD MEETING
MARCH 12, 2024 – MAYFIELD

HUDSON RIVER AREA - FEBRUARY SUMMARY

Reservoir Operation

Great Sacandaga Lake

The February average daily release from the Sacandaga Reservoir (Great Sacandaga Lake) was approximately 4,030 cubic feet per second (cfs). The Upper Hudson / Sacandaga River Offer of Settlement target elevation for February 28 is 749.46 feet (ft). The release of water from Great Sacandaga Lake was consistent with the Upper Hudson/Sacandaga River Offer of Settlement.

HUDSON RIVER AREA - FEBRUARY SUMMARY- continued

Operation Overview

Precipitation during the month of February was below normal across the Great Sacandaga Lake watershed and below average in the Indian Lake watershed. The monthly inflow to Great Sacandaga Lake and Indian Lake reservoir was approximately 106% and 96% of historic average, respectively. Monthly release of water from Great Sacandaga Lake and Indian Lake measured 144% and 143% of historic average, respectively.

Great Sacandaga Lake Operation

Great Sacandaga Lake operation summary report for the period February 1, 2024 through February 25, 2024 is attached. This report includes estimated forecast values for dates after February 25, 2024.

Hudson River Area Staff Activities

Staff completed routine maintenance and operations activities during the month.

A summary of Regulating District staff activities and work projects at the dam facilities is attached in the Operations Manager's Report.

BLACK RIVER AREA – FEBRUARY SUMMARY

Reservoir Operations

Stillwater Reservoir

The February average daily release from Stillwater Reservoir was approximately 600 cfs. The maximum discharge for the month was 600 cfs.

BLACK RIVER AREA - FEBRUARY SUMMARY - continued

Operation Overview

Precipitation in the month of February was below average at Stillwater and below average at Sixth Lake and Old Forge Reservoir. The monthly inflow to Stillwater Reservoir was approximately 98% of historic average. The inflow to Sixth Lake and Old Forge Reservoir totaled 0.08 and 0.20 billion cubic feet, or 73% and 83% of historic average, respectively, in February. Release of water from Stillwater Reservoir provided 110% of historic monthly average discharge.

Construction Progress Report

Report No: 04

Period: 01/16/24 through 02/16/24

Date: February 16, 2024

Prepared for: Donald E. Canestrari, John Smith
Bureau of Flood Protection and Dam Safety, Division of Water

Prepared by: Colliers Engineering & Design

On behalf of the Hudson River Black River Regulating District (HRBRRD), Colliers Engineering & Design has prepared this letter in accordance with the requirements of the Dam Safety Permit – Condition 9 – Construction Reports.

Contractor's Progress Schedule, including revisions:

- The most recent construction schedule is dated February 20, and is attached to this progress report. Revision to this schedule is anticipated and updates will be provided once received.

Summary of major work completed during period:

- SWPPP reports. – SWPPP Inspections conducted weekly, and reports located in binder onsite.
- Crane pad – Completed the removal of trees along embankment and trimming of limited trees in wetland area to allow for the emplacement of temporary crane pad. Completed installation of crane pad.
- In water equipment – Emplaced in water to facilitate work on the upstream side of Spillway area.
- Demolition – Removed walkway bridge over spillway.
- Coring – Continued coring the first 3 feet of primary grout holes in advance of drilling and grouting operations. Completed primary grout holes 1 and 2 in Main Logway Sill.
- Grouting – Grouted primary holes 1 and 2 in Main logway Sill.

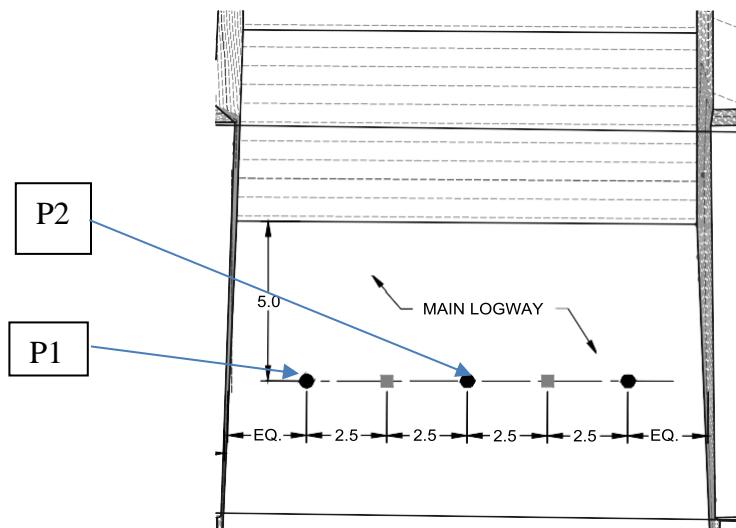

Summary of observations made by the on-site representative:

- Daily reports can be provided upon request.

Summary of observations made by the construction engineer during his site inspections:

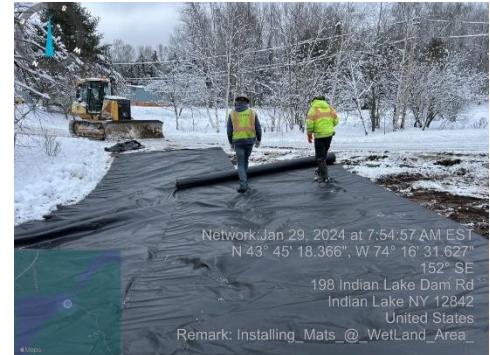

- During the water testing procedure in the Main logway, it was observed that in primary hole #2 there was a large volume of water exfiltration for all three 5-minute iterations of the test. Conversely primary hole #1 had a small volume of water exfiltration as well.

- Grouted Main logway primary holes #1 and #2. During the grouting of primary hole #1 it was found that within the top 1 foot of the hole there was a void located between two stone where the mortar seems to be eroded completely and the approved secondary mix would need to be used. It was determined that that hole will be left alone at that point and would move onto primary hole #2. Grout operations were then moved to primary hole #2. In the second section (15'-20' in depth) there was a large take up of grout that did not meet the refusal threshold. There was also small amount of grout that was observed to exit the dam on the upstream side. At that time all operations were halted and changed to the secondary mix for the grout. The secondary mix proved to be effective, and the section met the refusal threshold with no visible sign of seepage. Upon moving to the next 5' section the contractor reverted to the primary grout mix. This hole was completed with no further issues.
- No dam-safety specific visit has been made to the site yet, as the schedule progresses, and more work is performed site visits will be scheduled for priority activities and observations.

**Hudson River Area
Report of the Operations Manager
Sacandaga Field Office at Great Sacandaga Lake
March Board Meeting 2023**

Activity report for January & February 2024

SFO

- Cleaned offices and conference room weekly.
- Performed maintenance on vehicles and equipment.
- Conducted snow removal as needed.
- Had a new dump box installed on the dump truck.
- Continued reorganization of the tools and equipment in the maintenance garage.
- Built new seats and replaced sections of the floor on the pontoon boat.

Indian Lake

- Serviced and repaired the backup generator.

Conklingville Dam

- Read and reported piezometer data including spillway and toe observations daily.
- Conducted snow removal as needed.
- Installed new LED lights on the control house.
- Performed maintenance on vehicles and equipment.
- Installed new LED lights in the lower valve gallery.
- Conducted monthly valve test, 3 valves at 20%.
- Hauled broken log boom to shore and secured to embankment.

Respectfully,

Matthew Ginter

Operations Manager

Report of the Superintendent
Black River Field Office at the Stillwater Reservoir (BRFO)
January/February 2024

- Road maintenance, plowing
- Vehicle/equipment maintenance
- Snow surveys
- Continued barn renovations
- Removed deer from racks at OF
- Disposed of materials at transfer station
- Attended LEPC meeting
- Analyzed weir samples from Conklinville
- Serviced generator at SW Dam
- Prep/paint office (BRFO)
- Repaired trash rack (OF)
- SW staff gauges and Stevens recorder moved to 1988 NAVD (corrected)
- Monitoring continues: piezometers, weirs, profile surveys, seepage sites.
- Misc. gate changes at Stillwater, O.F. & S.L.
- Daily readings Stillwater, O.F. & S.L.
